Zest 155
Harvest 000

The Details

We utilize an aluminum top cap and one-piece rail where the slot channel trim and trim color are the same. In addition to styling, the one-piece rail is beneficial when connecting panels of different heights in a straight line. The 4-circuit power utilized has the outlets located in the middle of each panel, allowing for two duplex receptacles on each side of 24"-60" panels. Attached to the power harness are the jumpers for power continuation from panel to panel and panel through connector.

Expanded fabric and finish options available at an up-charge.

- Save up to 35% off the cost of comparable
- Shipped in 3 weeks, 4 weeks if custom materials are requested

* Fabric is railroaded, as shown above, except when used in combination with 85" high panels; not available with acoustical panels.

† Fabric is non-directional. All other fabrics are directional.

Colors shown are for representative purposes only. Actual swatches are available upon request.
