Submit Reset

No need fields
Remove -

1. the H1/2/3/4 images, we have as thumb-nail & large

2. $H1/2/3/4 > Sq. FI$

3. Eliminate “No file chosen” TEXT& SPACE.

Just a browse button, and either a tiny image shows up, or it doesn’t if we haven’t uploaded anything.

4. Reset button

5. H2/H3 > Room type

6. H4, H5 > The only thing ***we'd need here is the Header Text fields***. These are only so the user can add lines on the FRONT end, we wouldn't be adding any here in the backend. So on the FRONT end, need functionality to add Qty/Description/Sq Ft / Unit Price, which will add to the Grand Totals. These fields are not really needed in the ADMIN.

7. H6/H7/H8 > Delete these section

*both on Admin and Front end is EVERY group should have the same columns/fields, and have a uniform look all the way down the page
