FINISHES:

Paint: Lite Silver Smooth

Fabrics: Guilford - Phone Tag, Color: Limeade

Guilford - Phone Tag, Color: Skydive

Laminate: Formica - Peaseful Blue in Microdot finish

FINISHES:
Paint: Lite Silver Smooth
Fabric: Guilford - Color: Groove Mist
Laminate: Formica - Dune Wood
Glass Type: Clear, Spraylight

Panels are available in 6 heights, 6 widths, and 3 stack-on height options for a total available height of 130".

FINISHES:

Paint: Morning Dew

Fabrics: Jhane Barnes Textiles - Opening Night,
Colors: Tango & Big Screen.

Laminate: Formica - Flax Gauze

Glass: Clear

UNLEASH THE POWER

Symmetry's electrical system has more capacity and design flexibility of virtually any frame and tile system available today. It provides electrical and data cabling holes at every 8" of height, forming up to 10 laterally continuous raceway channels on an 82" high panel. Electrical and data may be snaked through the panel frames at every height, and multiple powerways can be positioned from the bottom of the panel up to 114" in height providing extensive cabling capacity and power access placement options. Power and data can be consolidated in single power tile offering up to 3 duplexes and 8 data jack housings in a single location.

LEGEND

- A Single Powerway Assembly at Base
- B Fiber Optic Bundle
- C Category 6 Data Cables
- D Double Powerway Assemblies Below Worksurface
- E Single Powerway Assembly in Overhead
- F Topcap Lay-in Channel
- G Triple Channel Pole
- H Single Powerway at Beltline
- I Shielded Metal Trough for Secure Data

ENHANCED STORAGE & COMPONENT OPTIONS

Escape from the traditional flat-front overhead storage design with the Radius overhead unit. Offered in both solid or perforated steel patterns, with an available easy-down mechanism, the Radius overhead adds an element of style and design that compliments the radius shape of the panel trim.

Panel mounted sliding doors are a perfect way to create a semi-private office environment using standard height panels.

Available for 36", 42" and 48" width openings, and 66" and 82" heights, the ultra light aluminum screen frame, and durable transparent nylon glide wheel result in a user-friendly and practical design. The universal design mounts to the left or right, front or back of the panel. A variety of standard opaque and semi-opaque screen styles are available, as well a standard insert design that makes the use of COM materials a snap.

ENDLESS TILE CONFIGURATIONS

Want a monolithic look? Use our tackable/acoustical fabric tiles to create it. They're available in a broad range of heights—from 8" to 64". Or take your design in a totally different direction. We offer other tiles in heights of 8", 16" or 24"; they're available in painted steel, perforated (Airflow), embossed steel, laminate, veneer, tool rails, whiteboard, open frame, electrical access and tempered glass (with two different standard colors and patterns). All are front-mounting and can be individually removed without disturbing the tiles above or below.

TOOL RAIL
Heights: 8"
Widths: 24" - 48" in 6" increments

TACKABLE ACOUSTICAL FABRIC
Heights: 8" - 64" in 8" increments
Widths: 24" - 48" in 6" increments

GLASS OR ACRYLIC
Heights: 16" and 24"
Widths: 24" - 48", in 6" increments

PASS-THROUGH OPEN FRAME
Heights: 16" and 24"
Widths: 24" - 48", in 6" increments

PERFORATED "AIR-FLOW" STEEL
Heights: 16" and 24"
Widths: 24" - 48", in 6" increments

WHITEBOARD
Heights: 16" and 24"
Widths: 24" - 48", in 6" increments

LAMINATE OR VENEER
Heights: 8", 16", and 24"
Widths: 24" - 48", in 6" increments

EMBOSSED STEEL
Heights: 16" and 24"
Widths: 24" - 48", in 6" increments

SOLID STEEL
Heights: 8", 16", and 24"
Widths: 24" - 48", in 6" increments

QUAD POWER, DATA OR COMBINATION
Heights: 8"
Widths: 24" - 48" in 6" increments

DUAL POWER, DATA OR COMBINATION
Heights: 8"
Widths: 24" - 48" in 6" increments

PANEL FRAME SIZES

FRAME AND TILE. STRONG AND EASY.

Rigid, welded roll-formed steel frame construction. Six full-frame panel widths. Six full-frame heights. Three structural stacking extension choices and floor-to-ceiling components. It all adds up to one solid system that adapts to any floor plan.
